

#### AV Requirements (include intros here)

My goal is to ensure a fantastic program; I'll exceed your expectations:  
Meeting these requirements will help:

- One hand-held cordless microphone
- One wireless lavalier microphone
- If recording, two cameras are suggested to capture audience interaction and close-ups; a copy of raw footage will be provided to Sharon at the end of the program
- Flip chart and black marker for concurrent sessions/training segments
- Lecterns should be removed or pushed to the side of the stage if needed for subsequent sessions

I'm a high-energy, high-content speaker, and I love to connect with the audience. I'll move around stage- and into the audience. Please consider this when planning your logistics.

Thanks so much!

Two intros:
